Subject: LWG supplemental technical analysis and information for draft FS
Attachments: Draft FS supplemental information list 11202013.pdf

Bob and Jim,

As you are aware, EPA and LWG have been engaged in discussions and conducted technical analysis on some key issues related to EPA's review of the draft FS, including fate and transport modeling and cost estimates. In our recent discussions on the process and schedule for revising the draft FS, we agreed that we need to dive in and make substantial progress on other issues. EPA has prepared a list of items (attached) where additional information and/or technical analysis is needed to keep the process moving forward.

EPA requests that the LWG provide the information described in the attached list. Please review the list and contact us to discuss questions or agency expectations. We anticipate that Kristine and I would be involved in the initial discussions, identifying key technical representatives to work out the details, and tracking progress.

Thanks, and we look forward to working with the LWG to meet our challenging schedule for completing the revisions to the draft FS.

Chip
